

# BRAZIL DISASTER RECOVERY PROJECT FOR INPLAYSOFT

## The Customer

**InplaySoft** is a leading iGaming software provider headquartered in London, UK, with a global reach. Founded in 2020, inplaySoft has quickly established itself as an innovative force in the industry, focusing on delivering intelligent solutions and profitable outcomes for gaming operators worldwide. InplaySoft's platform is designed for scalability and flexibility, allowing operators to manage multiple brands and markets from a single interface. To support their growth and comply with local regulations, inplaySoft sought Transputec's assistance in creating a Disaster Recovery (DR) environment in the AWS Brazil (São Paulo) region. This strategic move ensures business continuity and adheres to legal requirements mandating data storage within Brazil.

## The Challenges

InplaySoft embarked on a strategic initiative to establish a disaster recovery environment in the AWS Brazil region to comply with legal obligations for data

storage within Brazil. The project involved synchronising critical data across multiple availability zones, implementing robust security measures, including encryption and multi-factor authentication (MFA), and developing a manual failover strategy.

## Our Approach

Transputec systematically deployed AWS infrastructure, prioritising security with KMS, MFA, and TLS. Comprehensive logging and auditing were implemented for transparency. A key element was a manual failover strategy, regularly tested, supported by automated backup management for efficient data retention and cleanup procedures.

## The Outcome

InplaySoft achieved regulatory compliance and enhanced business continuity with a DR environment, which improved data redundancy and minimised downtime. This strategic IT implementation supported their growth, solidifying their position in the Latin American iGaming market.

“Transputec responded to an urgent requirement to deliver a solution for providing a DR environment in the AWS Brazil region. The solution designed addressed a critical business need within tight deadlines and was delivered quickly and efficiently.”

**Valentyn Kyrylenko**  
COO - InplaySoft
